Le Carré d'Agneau Dijonnaise
Le Chou-fleur Polonaise
Le Mazagran Portugais

Les Profiteroles au Chocolat

Les Fromages Affines

Le Café
Les Petits Fours

TORONTO NEUROSURGERY

Neurosurgery in Canada was first officially recognized as a specialty in 1923 when K.G. McKenzie went to Boston to train under Cushing. By present standards, the training Dr. McKenzie received was little more than an introductory course but on returning to Toronto in 1924, he limited his practice to Neurosurgery and soon established a reputation as one of the world leaders in the new specialty.

In 1933, William S. Keith was appointed neurosurgeon at the Hospital for Sick Children and this marked the recognition of the subspecialty of Paediatric Neurosurgery in Canada.

The third and final pre-World War Two appointment was that of E. Harry Botterell. Tom Morley succeeded Harry Botterell and presided over the expansion of the neurosurgical programme which had developed under Botterell's leadership. 1979 marked Tom Morley's retirement from the position of Chairman and he remains in active practice.

There are now six active Neurosurgical Units in the University (Toronto General Hospital with Mount Sinai Hospital, Hospital for Sick Children, Toronto Western Hospital, St. Michael's Hospital, Wellesley Hospital and Sunnybrook Medical Centre). Virtually all the neurosurgical practice—load in the Toronto catchment area is handled by the University hospitals whose staff are:

J.R. Fleming
F. Gentili
E.B. Hendrick
H. Hoffman
W. Horsey
A. Hudson
R. Humphreys
W. Lougheed
T. Morley
P. Muller

R. Perrin
D. Rowed
I.B. Schacter
H. Schutz
M. Schwartz
H. Smyth
R. Tasker
C. Tator
W. Tucker
G. Vanderlinden

The Toronto neurosurgeons have benefited enormously from their association with neurosurgical colleagues south of the border — indeed, the hospitality of our American colleagues has long since caused the political boundary to evaporate. As you look out over the university, with its annual medical student class of 250 students, we would like you to be assured of the very warm welcome and very special feeling of comradeship sent you by all Toronto neurosurgeons.
