

CNS

2025 CNS Neurosurgical Emergencies Course April 2, 9, 16, 2025 | Virtual

Course Overview

All neurosurgical practices deal with neurosurgical emergencies. This course is designed for neurosurgeons, neurosurgery advanced practice providers (APPs), neurologists, intensivists, and emergency medicine physicians. It provides information about state-of-the-art diagnosis, workup and first-line treatments for neurosurgical emergencies. Covered in detail are: resuscitation, advances in stroke management, the ever-changing landscape of anticoagulation, TBI, spine trauma, postoperative management, prognosis, and the care of the elderly with neurosurgical issues. Learning will be enhanced with active teaching techniques including case-based discussions as well as instruction by world experts. This is a good crash course for medical students and residents on how to be effective in the emergency operating room and a good primer for junior residents on seeing neurosurgical patients in the ER.

- Recognition of your company's support on the Supporters Flyer via the [course website](#) with a link out to a page of your choosing, on the virtual walk-in slides, one email communication to attendees, one CNS social media post, and verbal thank you for your company's support during the course.

EDUCATIONAL GRANTS

General Course Grant | \$10,000

The course directors go to great lengths to provide the most relevant and up-to-date content for this meeting. Help show your commitment to providing quality education with a course grant. If your budget cannot accommodate this requested amount, the CNS can work with you and accept an amount that's feasible for you this year.

2025 INDUSTRY ALLIES COUNCIL

Participation in any of the above opportunities will go towards your company's year-round support of the Congress of Neurological Surgeons and will contribute to your overall CNS Industry Allies Council Level, which provides additional recognition and benefits at the 2025 CNS Annual Meeting and throughout the year.
